Getting Social With Spray Foam Magazine

Chances are you've seen our Facebook, Twitter, and Instagram posts—how would you like to be included in one? Simply tweet us [@SprayFoam_com](https://twitter.com/SprayFoam_com) or tag us in a Facebook or Instagram photo at [@spray_foam](https://www.instagram.com/spray_foam) with the hashtag [#SprayFoamSpotlight](https://www.instagram.com/hashtag/SprayFoamSpotlight). Our favorite photos will be retweeted, and we'll even publish a few in the next issue of *Spray Foam Magazine*.

FOAMING IN PARADISE Have you ever dreamed of a spray foam application job with a background like this? For the crew at Sprayfoam Thailand, it's reality. Led by GM Marcus Goedvolk, they outfitted four bungalows on the tropical island of Koh Chang, off the coast of Eastern Thailand. 2lb. closed-cell foam was applied using SPF equipment imported from the U.S. — [Marcus Goedvolk, GM at Sprayfoam Thailand](https://www.instagram.com/marcus_goedvolk) // www.sprayfoamthailand.com

FOAM FLOATS Business owner of Adam R King Spray Foam Insulation (Souderton, PA) built a spray foam boat during some down time with his colleague and friend Kevin Heffentrager. The bottom, sides, seats, and seat supporters were constructed with a thin layer of plywood. The duo then sprayed 2.5 inches of closed-cell foam on the outside and 1.5 inches on the inside. The spray foam boat eventually made its epic debut successfully sailing down the Delaware River. Pictured here is Kevin, in all his glory, during the first test float in his grandmother's pool. — [Photo Provided by Adam King, Adam R King Spray Foam Insulation](https://www.instagram.com/adamking)

YU-KONT BEAT THAT VIEW, EH? Back Country Construction was subcontracted by Sands Construction for a job with a view in Haines Junction, Yukon, Canada. Four inches of 2lb. spray foam was installed in a large attic with a 4/12 slope. "Wasn't as nice of a view inside the roof, as it was outside", says Jordan Cross, Spray Foam Installer. Although it sure looks like break time made up for it! — [Photo Provided by Jordan Cross of Back Country Construction](https://www.instagram.com/jordan_cross)
